BOTTOM LINE UP FRONT

The venture's top risks are known and mostly controllable: **deal-structure ambiguity**, an **unverified client claim**, **well-funded competition**, and the classic **50/50 deadlock**. None is a reason not to proceed; each has a named mitigation and a clear owner. Surfacing them proactively is itself a mark of the plan's seriousness.

This register is reviewed at every milestone (post-CEO answers, first demo, first customer) and updated as risks change. It is a living control, not a one-off.
