

Vertical Modules Breakdown

The eight industry verticals SalesOps CRM covers — and why cross-vertical breadth is a UK wedge.

Pack 02 — Company & Product Deep-Dive

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Vertical Modules Breakdown
Purpose	Map the vertical module set to the UK renewables opportunity and the multi-trade installer trend.
Status	Build-now · Verified verticals
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

SalesOps CRM ships eight industry verticals in one platform. The UK's fastest-growing installers increasingly do **solar + heat pumps + battery together** — so a single system covering all three is a real advantage over single-vertical tools, and the most defensible differentiation to test in the demo.

1. The vertical set

Vertical	Relevance to the UK entry
Solar PV	Core UK target — 4,000+ MCS solar installers
Heat Pumps	Core UK target — integrates ciepło.app (sizing/design); 60,000+ UK installs in 2025
AC / Refrigeration	Adjacent HVAC trades
Service sales	Recurring service/maintenance contracts
Construction	Broadest UK trade segment; reachable via Futurebuild
Field Service / Maintenance	Reactive + planned maintenance operations
HRV / MVHR (rekuperacje)	Ventilation — a niche SalesOps already claims UK leadership in
IT / project management	General project delivery

2. Why breadth is the wedge

THE MULTI-TRADE TREND

UK renewables installers increasingly bundle solar, heat pumps and battery storage for the same homeowner (the "combo" pattern recurs across UK market coverage). An installer doing all three either runs three single-vertical tools or one platform that spans them. SalesOps CRM's breadth means it can be the one platform — a structural advantage that single-vertical competitors cannot easily match.

3. First-focus recommendation

Do not lead the UK entry with all eight verticals. Lead with **Solar PV and Heat Pumps** — the two with the largest, fastest-growing, most directly-reachable UK installer base (Pack 03, Pack 06) — and hold the breadth as the expansion story once the beachhead is won. Trying to be everything to every trade on day one dilutes the pitch.

4. Honest boundary

The depth of each vertical's UK-specific configuration (e.g. how completely the heat-pump module handles UK COP/BTU and MCS design requirements) is demo-dependent and unverified here — see Pack 20 for the questions that close this gap.

Sources & confidence

Claim	Source	Confidence
Eight verticals; ciepło.app integration	rrup.pl	 Verified
UK solar/heat-pump installer counts	MCS	 Verified
Multi-trade "combo" trend	UK market coverage	 Public
Per-vertical UK configuration depth	demo unavailable	 Pending demo
