BOTTOM LINE UP FRONT

The daily rhythm is simple and outreach-led: **prospect in the morning, demos and trials in the afternoon, admin last**. Protect selling time; let automation handle reminders. Consistency of daily activity is what produces the funnel volumes the model depends on.

The daily rhythm

Time	Activity
Morning	Outreach block — new touches + follow-ups (Pack 08 cadence); target 40–60 touches
Midday	Demos held (Pack 09)
Afternoon	Trial onboarding tasks (Pack 12); discovery calls
Late	Log activity in CRM; review tomorrow's demos; respond to inbound

PROTECT THE OUTREACH BLOCK

The single most important daily discipline is a protected morning outreach block. It's the top of the funnel; if it slips, everything downstream dries up 3–4 weeks later. Everything else can flex around it — this cannot.

Implication

A consistent daily rhythm is what turns the plan's assumptions into reality. The weekly and monthly cadences (this Pack) roll up from these daily habits.
