

Staffing Forecast & Capacity Model

How much the team can produce — and what it costs — at each stage.

Pack 13 — Staffing Plan

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Staffing Forecast & Capacity Model
Purpose	Tie headcount to output (capacity) and cost, feeding the financial model.
Status	Build-now ·  Illustrative capacity
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

A capacity model links headcount to output: one focused SDR can generate the ~40–60 daily outreaches the funnel needs (Pack 08); one AE can hold ~10–15 demos/week; one Implementation lead can onboard a manageable number of concurrent trials. This is what confirms the revenue model (Pack 16) is staffable, not just hopeful.

Capacity model (illustrative)

Role	Capacity	Feeds
SDR	40–60 outreaches/day → the funnel top	Pack 08 volume
AE	10–15 demos/week; close the qualified	Pack 08 conversion
Implementation lead	N concurrent 30-day onboardings	Pack 12 retention

The consistency check (per simulation)

RECONCILED WITH THE MODEL

The GTM viability simulation (Pack _SIMULATION) confirmed this capacity is **internally consistent** with the base-case revenue: one SDR's outreach volume supports the ~3 new customers/month the model assumes. Headcount, funnel and revenue agree — the plan is staffable at base assumptions.

Cost linkage

Each role's cost (Role_Job_Descriptions benchmarks) enters the Assumptions Register (Pack 16). Because hiring is trigger-gated (Hiring_Roadmap), cost only rises as capacity is genuinely needed.

Implication

The capacity model closes the loop between the sales plan (Pack 08), the org (this Pack), and the finances (Pack 16) — showing the numbers are not just optimistic but operationally deliverable.
