

Data Handling Policy

How the operation collects, stores, uses and disposes of data responsibly.

Pack 15 — Compliance & Data Protection

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Data Handling Policy
Purpose	A practical internal policy for day-to-day data handling.
Status	Build-now · Method (not legal advice)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

Practical rules for daily data handling: collect only what you need, store it securely in the CRM, use it only for its stated purpose, honour opt-outs immediately, and never import third-party proprietary lists. Simple discipline that keeps the operation lawful and trustworthy.

The rules

Rule	Practice
Minimise	Collect only data needed for the sales/onboarding purpose
Secure	Store in the CRM (access-controlled); no loose spreadsheets of personal data
Purpose-limit	Use contact data only for the outreach/relationship it was gathered for
Honour rights	Action opt-outs and access/erasure requests promptly
Clean sourcing	Only lawfully-sourced data; never a prior employer's or partner's proprietary list
Retention	Don't keep personal data longer than needed

THE CLEAN-SOURCING RULE MATTERS MOST

The fastest way to a serious problem is importing a client list you don't have the right to use. Build the prospect list from public registries (Pack 06/08) and lawfully-sourced data only. This protects the operation and, if a team member comes from a competitor, protects them too.

Implication

This policy operationalises the GDPR baseline (this Pack) into daily habits. It's short by design — a policy nobody reads protects no one.
