

Technical Due Diligence — Architecture & Scale

The architecture questions to put to RRUP's engineering team.

Pack 20 — Technical Due Diligence

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Technical Due Diligence — Architecture & Scale
Purpose	Verify the platform's scale, reliability and data model before committing.
Status	Build-now · Question set (for RRUP technical call)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

Before relying on the platform commercially, confirm its architecture holds up: performance at scale, reliability (the demo was down once), and how any large deployment was engineered. These are the right questions to ask RRUP's technical team in a dedicated call — verify, don't assume.

Architecture & scale questions

1. How does the central cloud repository handle high-volume, multi-tier photo galleries with permission controls as the UK user base grows — without degrading real-time search/query speed?
2. What is the platform's uptime/reliability track record, and what caused the recent demo-instance outage? What's the production SLA?
3. What technical guardrails prevent configuration debt that would slow future updates?
4. How is a large multi-division deployment scaled on the core platform, and what database/coordination bottlenecks were solved? *(If RRUP raises Polsat here, this is the place to ask them to substantiate it — Pack 02, Pack 22 Q6.)*

RELIABILITY IS COMMERCIAL

The demo outage during this research is a reminder: platform reliability is not just a technical detail, it's a sales risk (a demo that won't load loses the deal) and a retention risk. Get concrete answers on uptime and support response before scaling on it.

Implication

These answers confirm (or qualify) the "proven platform" pillar of the positioning (Pack 04). Ask them once a technical point of contact is established — likely after the commercial reset (Pack 22).
