

Technical Due Diligence — Integration & API

Confirming the integration capabilities the sales strategy depends on.

Pack 20 — Technical Due Diligence

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Technical Due Diligence — Integration & API
Purpose	Verify the API/integration depth behind the SAP co-existence and accounting-sync claims.
Status	Build-now · Question set
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

Two sales strategies depend on integration: the **SAP system-of-engagement** play (Pack 09) and **accounting sync** (Xero/Sage/QuickBooks). Confirm the API can actually deliver these before promising them — the open API is verified to exist (Pack 02), but the specific integration depth is not.

Integration & API questions

1. How are the REST APIs / web-service schemas optimised for real-time transfer of finalised contracts, project data and e-signatures into an external system of record (e.g. SAP S/4HANA) without transactional latency?
2. What ETL tools / bulk-migration scripts does the team use to safely migrate historical customer data from HubSpot/Salesforce/spreadsheets into SalesOps? (Critical for the 30-day onboarding, Pack 12.)
3. What are the supported/pre-built integrations to UK accounting tools (Xero, Sage, QuickBooks)?
4. For a field technician offline in a low-signal area, how does the local storage/offline sync protect data integrity before the office dashboard updates?

WHY THIS GATES THE ENTERPRISE PLAY

The SAP co-existence pitch (Pack 09) is powerful but must not be over-promised. Confirming the real integration depth here is what lets you sell it honestly to Tier-3 prospects — architecture and intent are sound; the specific build must be scoped, not assumed.

Implication

These answers determine what you can credibly promise on integration (Pack 09) and how smooth onboarding migration will be (Pack 12). Both are commercially load-bearing.

Sources & confidence

Claim	Source	Confidence
Open API exists	rrup.pl	✓ Verified
Specific integration depth	—	🚩 Verify with RRUP
