| <b>Document</b>       | Technical Due Diligence — UK Localisation Depth                            |
| <b>Purpose</b>        | Establish exactly what UK-specific functionality exists vs. must be built. |
| <b>Status</b>         | Build-now · Question set (gates the pitch)                                 |
| <b>Prepared by</b>    | Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM                       |
| <b>Version / Date</b> | v2.0 · July 2026 · Reading time ~4 min                                     |

### BOTTOM LINE UP FRONT

This is the highest-value technical verification: **what UK-specific functionality already exists** (MCS/DNO/ECO4 fields, UK VAT, GBP invoicing, MCS-compliant proposal templates) versus what must be built. It determines what you can promise a prospect and how fast you can onboard — and it's currently unknown because the demo was down.

## Localisation questions (verify in a live demo)

1. Are the MCS / ECO4 / DNO "procedure patterns" pre-built configuration templates, or built from scratch per client? (*This directly affects onboarding speed and cost — Pack 12.*)
2. Does the platform handle UK VAT (including 0% on qualifying energy-saving materials) and GBP invoicing natively?
3. How modular is the CPQ/pricing logic for UK technical metrics — BTU, heat-pump COP, roof-pitch/shading for solar?
4. Are there UK-compliant, branded proposal/contract templates ready to use?

### ASSUME BUILD-FROM-SCRATCH UNTIL PROVEN OTHERWISE

Until verified in a working demo, the plan conservatively assumes UK localisation must be built (flagged throughout the package). If RRUP has already done much of it (Pack 22, Q7), that's upside — faster launch, lower cost. Either way, **never promise a UK compliance feature to a prospect that you haven't seen working** (Pack 09).

## Implication

This verification unblocks honest, confident selling (Pack 09) and accurate cost/timeline (Pack 16). It's the top item for the first working-demo session with RRUP — arguably the single most important technical task in the whole package.

## Sources & confidence

| Claim                                           | Source           | Confidence    |
|-------------------------------------------------|------------------|---------------|
| 100+ modules / open API (localisation feasible) | rrup.pl          | ✓ Verified    |
| Actual UK localisation built                    | demo unavailable | 🚩 Verify (Q7) |
