

How to Use This Package

The recommended reading order and the workflow for updating it.

Pack 00 — Start Here

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	How to Use This Package
Purpose	Tell the reader how to get value fast and how to keep the package current.
Status	Build-now · Guidance
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

For the fast picture: read Pack 01, then Pack 23, then Pack 22. To act: send the ten CEO questions (Pack 22) and start the five actions in Pack 23's Executive Action Plan. To update: change the Assumptions Register (Pack 16) and the deal-structure branch (Pack 14) when the CEO answers, then rebuild.

Recommended reading order

If you want...	Read
The whole picture in 15 minutes	Pack 01 (Exec Summary) → Pack 23 (Master Report)
To act this week	Pack 22 (CEO Questions) + Pack 23 (Executive Action Plan)
The market/competition case	Packs 03, 04
The commercial playbook	Packs 06, 08, 09
The money	Packs 16, 17, 18
The deal/legal position	Packs 14, 15

How to update the package

This package is built to update cleanly, not to be rebuilt: 1. Record the CEO's answers in Pack 22's Answer_Capture_Template. 2. Update the **Assumptions Register (Pack 16)** — the financial model re-derives from it. 3. Set the **deal-structure branch (Pack 14)** and remove resolved flags (Polsat, pricing). 4. Rebuild the affected PDFs with the toolchain in _BUILD (run `bash _BUILD/build.sh`), and run `_CANONICAL/audit.py` to re-verify consistency.

THE DESIGN PRINCIPLE

Every fact traces to one source (`_CANONICAL/facts.md`) and every figure to one register (Pack 16). That means an update is a small, safe edit in one place that propagates — not a risky rewrite. The package is a living instrument.
