

Status of Information

What's verified, what's estimated, and what's still open — read before acting on any figure.

Pack 00 — Start Here

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Status of Information
Purpose	Make the confidence level of the whole package explicit and honest.
Status	Build-now · Transparency
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

This package separates what's **verified** from what's **estimated** from what's **open**, on every claim. The market, product and competitor facts are verified from primary sources. The financials are illustrative frameworks pending CEO inputs. Two items are explicitly flagged as unresolved. Nothing is dressed up as more certain than it is.

The flag system (used throughout)

Flag	Meaning
✓ Verified	Confirmed from a primary source (cited in the doc's footer)
📊 Public data	From public research; reliable but third-party
⚠ Assumption/estimate	A working figure to validate — not a fact
? Open — CEO	Awaiting the CEO's answer (Pack 22)
🚩 Audit flag	A prior claim that failed verification

What sits in each bucket

Verified ✓/📊	Illustrative ⚠	Open ?/🚩
RRUP scale, product, pricing	Financial forecasts	Deal structure (Q1)
UK market data	Conversion/CAC/churn	UK pricing
Competitor pricing/funding	Customer targets	Polsat client claim (🚩)
Trade shows, funding terms	Comp/cost estimates	UK localisation depth

THE ONE RULE FOR THE READER

Before acting on any number, check its flag. A ✓ figure you can rely on; a ⚠ figure is a scenario to validate; a ? item needs the CEO. This honesty is deliberate — it's the difference between a plan you can trust and one that misleads (the exact failure this whole reset exists to avoid).
