

Pricing Analysis

RRUP's per-seat model versus Payaca's flat-rate — the structural price wedge, quantified.

Pack 02 — Company & Product Deep-Dive

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Pricing Analysis
Purpose	Analyse the pricing model as a competitive lever and frame the UK pricing decision.
Status	Build-now · Verified pricing (Polish list + competitor)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

BOTTOM LINE UP FRONT

RRUP prices **per seat** (≈£8–20/user/month on its Polish list); Payaca, the UK leader, prices **flat at £999–1,199/month** plus £1,500 onboarding. For a small installer (say 5–8 office/field users) a per-seat model can land well below Payaca — a genuine wedge for the price-sensitive small-installer segment. UK pricing is unset and is a CEO decision (do not quote it as fixed).

1. The RRUP pricing ladder

Exhibit 1: RRUP per-seat pricing ladder (Polish list, net of VAT; GBP approximate at 1 PLN ≈ £0.198).

Per-seat pricing falls as seat count rises — from 100 zł (~£20) per user/month at 1–10 seats down to 40 zł (~£8) at 500+. This rewards larger deployments and gives a natural expansion-revenue path as a customer grows.

2. The competitive contrast

Vendor	Pricing model	Entry cost (illustrative small installer)
SalesOps CRM (per Polish list)	Per seat	~£8–20 × seats — e.g. 6 seats ≈ £72–120/mo  (UK price unset)
Payaca	Flat £999–1,199/mo + £1,500 onboarding	£999+/mo from day one
Reonic	Enterprise/quote (~\$25k min projects reported)	High / opaque

THE WEDGE

A newly-scaling installer with a handful of users faces ~£1,000/month + £1,500 upfront to adopt Payaca. A per-seat model priced even at a UK premium over the Polish list could plausibly enter at a fraction of that. For the **fastest-growing segment** — small, cost-conscious installers (Pack 06) — this is a real reason to switch, and the sharpest single commercial argument in the pitch.

3. The UK pricing decision

NOT YET SET — A CEO DECISION

The Polish list is a **reference, not a UK quote**. UK pricing must be set with RRUP. The recommendation for modelling (Pack 16) is a scenario band of the Polish list × {1.0, 1.3, 1.5} to reflect plausible UK uplift, all flagged as assumptions. Do not state a UK price as fixed to any prospect until RRUP confirms it.

4. Implication

Pricing is a strength to lead with **only if** UK pricing is set low enough to preserve the wedge while remaining margin-viable. The financial model (Pack 16) tests exactly this trade-off; the pricing decision should be an explicit, early agenda item with the CEO.

Sources & confidence

Claim	Source	Confidence
RRUP per-seat tiers	rrup.pl/cennik	 Verified
Payaca £999–1,199/mo + £1,500 onboarding	payaca.com/pricing	 Verified
