BOTTOM LINE UP FRONT

RRUP sp. z o.o. is a real, registered, and materially scaled Polish software vendor — 15,000+ users and 600+ deployments — not an early-stage prospect. The parent-company risk that would normally shadow a market-entry partnership is low. The open risk sits in the **commercial terms** and one **unverified client claim**, not in whether the product or company is real.

1. Legal identity

Attribute	Detail
Legal entity	RRUP sp. z o.o. (Polish limited-liability company)
KRS (company register)	0000978166
NIP (tax ID)	5423451043
Head office	ul. Świętego Andrzeja Boboli 24, 15-649 Białystok, Poland
Second office	ul. Zawadzkiego 1, 16-500 Sejny, Poland
Sales / Support	+48 574 422 173 / +48 731 426 000
UK-facing brand	"SalesOps CRM" (salesopscrm.com)

The registration numbers are publicly checkable in the Polish court register (KRS) and tax system (NIP). This is a substantive, verifiable business — the first thing a diligent partner confirms, and it holds.

2. Scale — why this de-risks the venture

15,000+

PLATFORM USERS

600+

DEPLOYMENTS

2.5m+

DOCUMENTS GENERATED

A product with 600+ live deployments and 15,000+ users has cleared the two hardest questions a market-entry partner faces: *does the software actually work at scale, and do real businesses pay for it?* Both are answered before a single UK conversation. This is the single strongest asset in the whole venture — you are not selling an unproven MVP; you are localising a proven engine.

3. The two-brand structure !

RRUP operates its Polish-market product as **RRUP CRM** and its UK-facing product as **SalesOps CRM** — the same underlying engine, a different brand for a different market. Public search descriptions already position SalesOps CRM in superlative UK terms ("the most extensive CRM for the HRV systems industry available on the UK market").

THE GAP TO CLOSE

The UK **brand and marketing claims already exist**, but — per the situation described — there is no UK team, customer base, or support operation behind them yet. The website is ahead of the business. Making those published claims **true** is a large part of the job this partnership exists to do. This is a strength to name openly with the CEO, not a problem to hide.

4. What could not be verified — and must be raised 🚩

AUDIT FLAG — DO NOT REPEAT UNTIL CONFIRMED

Prior planning material named **Grupa Polsat Plus** (a major Polish conglomerate) as RRUP's flagship client and central credibility asset. This could not be verified anywhere — it does not appear on RRUP's own website, which instead features genuine mid-market testimonials. Treat it as unconfirmed and raise it directly with the CEO (Pack 22, Q6). Do not use it in any pitch, document, or outreach until substantiated in writing.

5. Implication for the venture

The corporate foundation is sound. Diligence effort should now concentrate not on "is this real" (it is) but on the two genuinely open items: **the commercial/legal deal structure** (Pack 14, Pack 22 Q1) and **the verifiable client-reference set** (Pack 22 Q5–Q6). Everything else in this package can proceed on the confidence that the parent and product are real and proven.
