

Ideal Customer Profile

The precise first-beachhead customer — defined tightly enough to target and disqualify.

Pack 06 — ICP & Segmentation

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Ideal Customer Profile
Purpose	Define who to sell to first so every downstream channel and pitch is aimed correctly.
Status	Build-now · Reasoned from verified market data
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

BOTTOM LINE UP FRONT

The first-beachhead ICP is a **MCS-certified solar and/or heat-pump installer with roughly 10–50 employees** — large enough to feel the pain of spreadsheets and WhatsApp, small enough to move fast and to be priced out by Payaca's flat fee. This is the segment where all three of our advantages (proof, breadth, per-seat price) land hardest.

1. The ICP, precisely

Attribute	Target
Certification	MCS-certified (in the public database — reachable) 
Trade	Solar PV and/or heat pumps (the two largest, fastest-growing UK segments)
Size	~10–50 employees / a handful to a dozen+ software seats
Stage	Scaling — outgrowing spreadsheets/WhatsApp, not yet locked into a multi-year incumbent contract
Geography	North West beachhead first (Pack 03), extensible to Midlands/Yorkshire
Pain	Slow quotes, dropped hand-offs, manual compliance paperwork, manual commission calculation

2. Why this segment (the scoring logic)

WHERE OUR WEDGE IS SHARPEST

This segment scores highest on a simple weighting of **reachability** (every firm is in the MCS database), **pain intensity** (10–50 staff is exactly where informal tools break), **switching readiness** (no entrenched incumbent contract), and **price fit** (per-seat undercuts Payaca's £999+/mo). No other segment scores as well on all four at once.

3. Who to deliberately disqualify

Not now	Why
Sub-5-person owner-operators	Too informal/price-sensitive to adopt; low ARR, high support burden
Enterprise installers on Salesforce/SAP	Long cycles, heavy customisation; wrong first battle
Firms mid-contract with Payaca/Commusoft	Switching cost too high right now — revisit at renewal

Disqualifying well is as valuable as targeting well: it keeps the lean pod (Pack 13) focused on winnable deals.

4. Implication

Every channel (Pack 08), sequence (Pack 08), demo (Pack 09) and metric (Pack 10) is tuned to this ICP. When in doubt about a prospect, the test is: *scaling MCS solar/heat-pump installer, 10–50 staff, not locked in?* If not, deprioritise.
