

Automation Rules

The automations that let a tiny team operate like a bigger one.

Pack 10 — Internal CRM & Pipeline

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Automation Rules
Purpose	Specify the workflow automations that reduce manual admin in the sales operation.
Status	Build-now · Method
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

Use the Work-Flow engine (the same feature you sell) to automate the repetitive parts of your own sales admin — follow-ups, reminders, trial-onboarding tasks — so the lean team spends time selling and onboarding, not chasing its own to-do list.

Core automations

Trigger	Automated action
Lead enters "Contacted"	Schedule follow-up sequence (Pack 08 cadence)
Demo booked	Reminder + prep checklist to AE
Trial started	Kick off 30-day onboarding task chain (Pack 12)
Trial day 7 / 21 / 28	Check-in reminders (protect conversion)
Deal won	Handover-to-onboarding + referral-ask task (Pack 07)
Deal lost	Prompt to log reason (win/loss learning, Pack 04)

AUTOMATION AS LEVERAGE

For a pod of one to three, automation is what makes the numbers work — it's the difference between an SDR managing 40–60 touches/day (Pack 13) and drowning in manual reminders. It also, again, proves the product's value by living it.

Implication

These automations are configured once (Pack 10 CRM Setup) and quietly multiply the team's capacity — directly supporting the funnel volumes the model assumes (Pack 08/16).
