

Sales KPI Dashboard

The handful of numbers that actually tell you if the machine is working.

Pack 10 — Internal CRM & Pipeline

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Sales KPI Dashboard
Purpose	Define the minimum KPI set for objective weekly management.
Status	Build-now · Method + ⚠ targets to validate
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

Track a **small set of leading and lagging indicators** — outreach volume, demos held, trials started, trial → paid, and revenue. Leading indicators (activity, demos) predict; lagging ones (revenue) confirm. Watch the conversion rates between stages most closely — they reveal where to fix.

The KPI set

KPI	Type	Illustrative target (⚠)
Outreaches / day	Leading	40–60 (Pack 13)
Replies / week	Leading	~30
Demos held / week	Leading	10–15
Trials started / week	Leading	~5
Trial → paid	Lagging	40%+ (⚠ validate)
New customers / month	Lagging	3 base (Pack 16)
MRR (your share)	Lagging	Grows with retained base

MANAGE THE RATIOS, NOT JUST THE TOTALS

The gaps between stages (reply → demo, demo → trial, trial → paid) are where the money is made or lost. A 5-point gain in trial → paid beats a 20% rise in raw outreach. The dashboard's job is to make those ratios visible weekly so effort goes where leverage is highest (Pack 08).

Implication

This dashboard is the weekly operating rhythm (Pack 11) and the early-warning system for the financial model's assumptions (Pack 16). Targets are illustrative until real data replaces them.

Sources & confidence

Claim	Source	Confidence
