

Financial Assumptions Register

The single source of every number in the financial model — each driver, its value, its status.

Pack 16 — Financial Forecast

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Financial Assumptions Register
Purpose	Make the model transparent and self-correcting — change a driver here, the whole model re-derives.
Status	CEO-GATED · ⚠ Illustrative drivers pending CEO/pilot data
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~6 min

? PENDING CEO ANSWERS — READ FIRST

This register drives every figure in Pack 16–18. The most material drivers (UK price, revenue share, deal structure) are **not yet set** and depend on the CEO (Pack 22, Q1/Q9) and RRUP's pricing decision. The values below are **explicit, editable, illustrative assumptions** — a working scenario, not a forecast. When the CEO answers, update this one table and the models re-derive.

BOTTOM LINE UP FRONT

Every number in the financial pack traces to a driver in this register. Nothing is invented in the forecast documents — they compute from here. This is deliberate: it keeps the model honest and lets it update instantly when real inputs arrive.

Revenue drivers

Driver	Base (⚠)	Range (bear–bull)	Status / source
UK price per seat / month	£18	£12–£25	⚠ Polish list × uplift; UK price unset (Q)
Avg seats per customer	6	4–10	⚠ Estimate; validate
Avg revenue per customer / month	£108	£48–£250	= price × seats (derived)
New customers / month (steady, Yr1)	3	1–6	⚠ From funnel (Pack 08)
Annual churn	15%	25%–8%	⚠ Estimate; ask RRUP for PL proxy
Your revenue share	50%	per deal structure	? CEO Q1/Q9 (equity vs commission)

Cost drivers

Driver	Base (⚠)	Status / source
Founder drawings / salary	modest, self-set	⚠ Your input
First hire (SDR or AE) — when	Month 6–9 (traction-gated)	⚠ Pack 13
SDR cost (base)	~£30k	📊 UK benchmark (Pack 08 research)
AE cost (base)	~£50k	📊 UK benchmark
Marketing (trade show + basics)	traction-gated	⚠ Pack 07
Legal / formation	one-off, low-thousands	⚠ Pack 14 quote
Software/tools/overhead	low (co-working)	⚠ Pack 09
CAC (blended)	to be measured	⚠ Free MCS channel keeps low; validate

The rule

ONE PLACE TO CHANGE

The forecast, cashflow, scenario and investor documents in this package all compute from the drivers above. To update the model when the CEO sets pricing and structure, edit **this table only** — do not hand-edit the downstream numbers. This is the Operating-Manual discipline of a single source of truth, applied to finance.

Implication

Until Q1 (deal structure) and UK pricing are set, treat all downstream financials as a **shape and sensitivity study**, not a commitment. Their value now is showing the business can work across a plausible range — which the scenario analysis demonstrates.

Sources & confidence

Driver group	Confidence
Salary benchmarks	📊 Public (2026 UK data)
Price, seats, conversion, churn	⚠ Assumption — validate
Revenue share, deal structure	? CEO
