? PENDING CEO ANSWERS

All figures illustrative, from the Assumptions Register; UK price and revenue share unset.

BOTTOM LINE UP FRONT

Year 1 is a **proof year, not a profit year**: build the beachhead, keep the base lean (largely founder-led), reach ~30 customers under base assumptions, and cover the modest cost base without heavy hiring. The plan is designed so Year 1 is survivable on a Start Up Loan even if revenue runs to the bear case.

Illustrative Year-1 shape (base)

Line	Illustrative	Note
Customers (end of year)	~30	3/month base (Pack 08)
Revenue (your share)	~£48k	 at £108/customer/mo, ramping
Team cost	Low	Founder-led; first hire only if traction supports (Pack 13)
Marketing	Low	One trade show + basics (Pack 07)
Legal/formation	One-off	Pack 14
Overhead	Low	Co-working
Net position	Near/at breakeven or modest loss covered by loan	The loan funds the ramp

THE YEAR-1 DISCIPLINE

Year 1 deliberately does not hire the full pod or take big stands. It proves the motion with a lean base so that Year 2 expansion is funded by demonstrated traction, not hope. This is exactly what a Start Up Loan mentor and a partner-CEO want to see: spend gated on proof.

Dependencies

Revenue share (Q1/Q9) and UK price change these figures materially. The *shape* — lean, proof-focused, loan-covered — holds regardless.

Implication

Year 1's job is evidence: 3+ references, a repeatable motion, and validated conversion. Hit that, and Year 2 (next docs) becomes an expansion funded by traction.
