

Year 2 Forecast

The expansion year — funded by Year-1 proof, not by fresh risk.

Pack 16 — Financial Forecast

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Year 2 Forecast
Purpose	Show the Year-2 shape as traction-gated expansion.
Status	CEO-GATED · ⚠ Illustrative — from Assumptions Register
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

? PENDING CEO ANSWERS

Illustrative, from the Assumptions Register.

BOTTOM LINE UP FRONT

Year 2 is where the model turns: with a proven motion, add the first sales hire, expand to adjacent segments/regions (Pack 06 Tier 2), and grow the customer base several-fold. Under base assumptions Year 2 moves from proof to genuine contribution — but only if Year-1 conversion validated.

Illustrative Year-2 shape (base ⚠)

Line	Illustrative	Note
Customers (cumulative, net of churn)	~90–120	Faster acquisition with a second seller
Revenue (your share)	~£150k–£170k	⚠ base; scales with retained base + new
Team	Founder + 1–2 hires	Gated on Year-1 proof (Pack 13)
Marketing	Increased (2 trade shows)	Still proportionate
Net position	Contribution positive in base	Retained revenue compounds

THE COMPOUNDING EFFECT

Year 2 benefits from Year-1's retained, recurring customers plus new acquisition — the SaaS compounding that makes the model attractive. Retention (Pack 12) is what makes Year 2 work; churn is the enemy of the compounding.

Dependency

Year 2 is explicitly gated on Year-1 proof (repeatable motion, validated conversion). If Year 1 disappoints, Year 2 stays lean rather than expanding into unproven demand.

Implication

Year 2 is the year the venture demonstrates it can scale, not just survive — the evidence a growth lender or the CEO would want before backing further expansion (Pack 18).
