Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Loan Risk Mitigation
Purpose	Show a lender the repayment risks are identified and mitigated.
Status	Build-now · Reasoned
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

The main repayment risks — slow adoption, deal-structure delay, competition — are the same ones the whole plan already mitigates through a lean base and gated spend. Because the cost base is low and the lead channel is free, the venture can service a modest loan even if growth disappoints.

Risk → mitigation (repayment lens)

Risk to repayment	Mitigation
Slow customer acquisition	Lean base means low monthly burn; loan term is long; free MCS channel keeps trying at near-zero cost
Deal structure unresolved delays launch	Loan pursued in parallel; founder can begin market-building (outreach) before final signing
Competition compresses growth	Focused segment + price wedge; not competing on spend
Personal circumstances	Unsecured personal loan — understood; mitigated by conservative amount and long term

THE CORE PROTECTION

Low fixed costs + recurring revenue + a long, flexible repayment term = a loan that can be serviced across a wide range of outcomes. The plan does not need everything to go right to repay — that asymmetry is the strongest repayment-risk mitigation there is.

Implication

The loan is a sensible, well-protected first capital source. Combined with the free mentoring it carries, it both funds and strengthens the venture.
