

Investment Case

The case for backing the UK venture — if and when outside capital becomes relevant.

Pack 18 — Investor Pack

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Investment Case
Purpose	Provide an investor-facing thesis, held ready for the equity-structure scenario.
Status	CEO-GATED · ⚠ Applies mainly IF equity structure; SEIS/EIS caveat
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

? STRUCTURE-DEPENDENT + SEIS/EIS CAVEAT

This pack is most relevant if the deal is an equity structure (Pack 14). Note: **SEIS/EIS relief is likely unavailable** because a foreign parent without a UK permanent establishment doesn't qualify the UK entity — a material point for any UK angel (Pack 22 to explore with CEO; solicitor to confirm).

BOTTOM LINE UP FRONT

The investment thesis is clean: back a lean UK operator to localise a **proven** European platform into a fast-growing, policy-backed market that a VC-funded competitor (Reonic) is already validating — at a fraction of Reonic's capital intensity. The near-term funding need is small (a Start Up Loan may suffice); outside equity is a growth-phase option, not a launch necessity.

The thesis in five points

1. **Proven product** — 600+ deployments removes product risk (Pack 02).
2. **Real, growing market** — policy-backed, +50% forecast (Pack 03).
3. **Validated by a funded competitor** — Reonic's €13M UK push confirms the space (Pack 04).
4. **Capital-efficient entry** — free lead channel, lean pod; wins on focus not spend (Pack 05/08).
5. **Underserved segment** — small installers both incumbents price past (Pack 04/06).

Unit economics framing ⚠

WHAT AN INVESTOR WILL TEST

The decisive metrics are **LTV/CAC** and **payback period**. With a near-free primary lead channel (MCS database) and recurring per-seat revenue, blended CAC can be low and LTV compounds with retention — a potentially attractive ratio. But these are **assumptions to prove with pilot data** (Pack 16), not yet demonstrated. An honest investor case says so.

Why the raise (if any) is modest

The launch is designed to run on a Start Up Loan. Outside equity only makes sense to accelerate Year-2/3 expansion once unit economics are proven — a far stronger position to raise from than pre-traction.

Implication

Hold this pack for the growth phase and the equity scenario. Its most useful near-term function is disciplining the plan to investor-grade logic (unit economics, capital efficiency) even while self/loan-funded.
