

Compliance Risks

Data protection and regulatory risks of operating in the UK.

Pack 19 — Risk Management

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Compliance Risks
Purpose	Detail compliance risks so they're controlled from formation, not retrofitted.
Status	Build-now · Verified obligations
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

The main compliance risk is **UK GDPR**: handling installer and their customers' data, and the cross-border data flow to RRUP's EU servers, without proper registration and agreements. It is low-likelihood if addressed at formation, high-impact if ignored. Fix it on day one (Pack 15).

Detailed compliance risks

Risk	Impact	Mitigation
Operating without ICO registration	Regulatory exposure	Register with the ICO at company formation (Pack 15)
No Data Processing Agreement with RRUP (EU servers)	Unlawful cross-border processing	Put a DPA in place as part of the partnership (Pack 14/15)
Non-compliant outbound (cold email)	ICO complaint, reputational	Lawful basis + opt-out + suppression from the first email (Pack 08/15)
Handling homeowner data (via installers)	Data-subject risk	Clear controller/processor roles; data-handling policy (Pack 15)
Using a prior employer's data	Legal breach	Never import third-party proprietary lists (Pack 06/08)

NON-NEGOTIABLE FROM DAY ONE

UK GDPR compliance is not a "later" item. ICO registration and a DPA are cheap and fast to put in place, and their absence turns a routine operation into a liability. Handle at formation.

Implication

Compliance risk is fully controllable and inexpensive to mitigate — provided it's done at the start. Pack 15 provides the actual policies; this register ensures it's on the day-one checklist (Pack 21).

Sources & confidence

Claim	Source	Confidence
ICO registration + DPA requirement	ICO / UK GDPR	✓ Verified
