

Operational Risks

The risks in delivery, product dependence and the demo environment.

Pack 19 — Risk Management

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Operational Risks
Purpose	Detail delivery/product/execution risks with mitigations.
Status	Build-now · Reasoned
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

The operational risks centre on **dependence on RRUP** (product, localisation, demo environment) and **onboarding capacity**. They're mitigated by confirming RRUP's obligations in writing (Pack 14) and by treating onboarding quality as a core, resourced function (Pack 12/13).

Detailed operational risks

Risk	Impact	Mitigation
Demo/trial instance down (happened once)	Failed pitch	Confirm environment live before every demo; keep a UAT screenshot fallback (Pack 09)
RRUP localisation gap (MCS/VAT not built)	Deals stall mid-cycle	Confirm scope with RRUP (Q7); demo-verify (Pack 20); scope honestly with prospects
Onboarding under-resourced → trials fizzle	Low trial → paid	Dedicated implementation lead; structured 30-day process (Pack 12)
Over-reliance on RRUP support responsiveness	Delivery delays	Agree SLAs/obligations in the partnership terms (Pack 14)
Founder-dependency (you are the operation early)	Single point of failure	Document SOPs (Pack 12); hire the pod as traction allows (Pack 13)

THE DEPENDENCY TO MANAGE

The UK operation depends on RRUP for the product, its reliability, and much of its localisation. That dependency is normal for this model but must be **made explicit and contractual** (Pack 14), not assumed — so that RRUP's obligations to you are as documented as yours to the customer.

Implication

Operational risk is manageable but hinges on a well-defined RRUP relationship (Pack 14) and a properly resourced onboarding function (Pack 12) — both already built into the plan.
