

Answer Capture Template

Where the CEO's answers go — and which document each answer unblocks.

Pack 22 — CEO Questions & Reset

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Answer Capture Template
Purpose	Turn the CEO's answers into an actionable update map across the package.
Status	Build-now · Template
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

Record each answer here, then update the packs it unblocks. Most answers flow into three places: the deal structure (Pack 14), the financial Assumptions Register (Pack 16), and the pitch (Pack 09). This template makes the "answers → updated package" step mechanical.

Capture & unblock map

Q	Answer (record here)	Unblocks
1. Deal structure	_____	Pack 14 (choose branch); Pack 16/17/18 revenue treatment
2. Bart baseline	_____	Clears assumptions; informs Pack 14 terms
3. Contributions	_____	Pack 14; Pack 16 cost side
4. Existing UK pipeline	_____	Pack 03/08 (adjust "start from zero" assumption)
5. Reference clients	_____	Pack 02/09 (usable references)
6. Polsat	_____	Pack 02 (confirm or drop the flag)
7. UK localisation	_____	Pack 16 cost; Pack 09/20 (what to promise)
8. Exclusivity	_____	Pack 14 (territory terms)
9. Commercial mechanics	_____	Pack 16 Assumptions Register (revenue share)
10. Timeline/review	_____	Pack 05/21 (pace); Pack 14 (review point)

THE UPDATE DISCIPLINE

When answers arrive, change the **Assumptions Register (Pack 16) first** — the financial model re-derives from it. Then set the deal-structure branch (Pack 14). Then remove the resolved flags (Polsat, pricing) across the affected docs. The self-healing audit (Pack _BUILD) then re-verifies consistency.

Implication

This template closes the loop: the package is built to update cleanly the moment the CEO answers, rather than needing a rebuild. That's the design paying off.
