

Dependency Map

What depends on what — so you resolve things in the right order.

Pack 23 — Master Integration Report

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Dependency Map
Purpose	Show the critical dependencies, especially the CEO-gated ones.
Status	Build-now · Synthesis
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~3 min

BOTTOM LINE UP FRONT

Almost everything downstream depends on two CEO answers — **deal structure** and **UK pricing**. Resolve those and the package cascades from "framework" to "executable." This map shows the chain so effort goes to the unblocking items first.

The critical dependencies

This...	...depends on	Status
Legal form, funding, economics	Deal structure (Q1)	? Gate
Financial model figures	UK pricing (Q) + revenue share (Q9)	? Gate
Pitch credibility (client refs)	Polsat verification (Q6) + real refs (Q5)	🚩 / ?
What to promise on features	UK localisation (Q7) + demo verification (Pack 20)	🚩
Territory investment safety	Exclusivity (Q8)	?
Launch pace	Deal + funding	⚠️ Gated
Everything else (market, competitors, ops, SOPs, GTM)	—	✅ Buildable now (and built)

THE GOOD NEWS IN THIS MAP

The **majority** of the package — market, competitors, ICP, lead gen, sales motion, operations, SOPs, risk, compliance — depends on **nothing gated** and is complete. Only the legal/financial/credibility layer waits on the CEO. That's a well-sequenced position: you can act on most of the plan today while the gates resolve.

Implication

Resolve the two gates (Pack 22, Q1 and pricing) first — they unblock the most. This map is the guide to what the CEO's answers will change (see Pack 22 Answer_Capture_Template).
