

Master Integration Report

The whole Company-in-a-Box, synthesised — the single document that ties it all together.

Pack 23 — Master Integration Report

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Master Integration Report
Purpose	Give the CEO (and you) a coherent synthesis of all 24 Packs in one place.
Status	Build-now · Synthesis of the full package
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~8 min

BOTTOM LINE UP FRONT

This package maps the entire SalesOps CRM UK venture end-to-end and reaches one conclusion: it is a **defensible, fundable, capital-efficient opportunity** built on a genuinely proven product and a real, growing market — held back only by two resolvable open items (deal structure, UK pricing) and one claim to verify (Polsat). Resolve those with the CEO and the package becomes an executable plan.

1. The thesis, in one paragraph

Localise RRUP's proven installer-CRM (600+ deployments) into the UK's policy-backed renewables market via a lean, founder-led operation, winning the small-installer segment that Payaca (£999+/mo flat) and Reonic (enterprise-tilt) underserve, using free MCS-database outreach and a free-trial motion, funded by a UK Start Up Loan. Reonic's €13M-funded entry into the same space independently validates the opportunity.

2. What each Pack established

Pack	Conclusion
02 Company/Product	Real, scaled, proven vendor; per-seat wedge; Polsat unverified (🚩)
03 Market	Real, growing, policy-backed; bounded niche (TAM/SAM/SOM)
04 Competitors	Contested but open; small-installer segment underserved
05 Business Plan	Coherent model; two gated variables
06 ICP	Scaling MCS solar/HP installers, 10–50 staff
07 Marketing	Outbound + credibility, not brand spend
08 Lead Gen	Free MCS channel from day one; funnel math honest
09 Sales	Trial-led motion; SAP play for Tier-3
10–13 Ops	Runnable on a lean pod; capacity reconciled with revenue
14 Partnership	Deal structure unresolved — the top gate
15 Compliance	GDPR/ICO/DPA — cheap, do at formation
16–18 Finance	Viable across scenarios; illustrative pending CEO
19 Risk	All top risks named and mitigated
20 Technical DD	Verify localisation/API/residency with RRUP
21 Launch	Parallel gates + engine; references by day 90
22 CEO Questions	Ten questions resolve every open item

3. The three things that gate everything ? 🚩

RESOLVE THESE AND THE PLAN IS EXECUTABLE

(1) Deal structure (equity vs agency) — gates legal, funding, economics (Pack 14). **(2) UK pricing** — gates the model (Pack 16). **(3) Polsat** — verify before any use (Pack 02). All three are addressed by the ten CEO questions (Pack 22). Nothing else material is unresolved.

4. The simulation verdict ✅

Four simulations (financial sensitivity, competitive war-game, adversarial red-team, GTM viability) found **no fatal contradiction**. The plan is internally consistent across market, funnel, staffing and finance at base assumptions. The dominant value levers are trial → paid conversion and UK pricing.

5. The recommendation

Proceed — with discipline. Send the CEO questions, engage a solicitor, start the Start Up Loan, and begin market-building in parallel. The venture is real; the next move is to close the three gates and start the

engine.

Sources & confidence

Basis	Confidence
Product/market/competitors	 (Packs 02–04)
Financials	 Illustrative (Pack 16)
Gates	 (Pack 22)
