

Segmentation Model

The full segment map, tiered by priority, so expansion follows evidence not impulse.

Pack 06 — ICP & Segmentation

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Segmentation Model
Purpose	Provide the tiered segment map that governs sequencing beyond the beachhead.
Status	Build-now · Reasoned
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

Segments are tiered by how well they fit the three advantages. Tier 1 (scaling solar/heat-pump installers) is the beachhead; Tier 2 (multi-trade and adjacent trades) is the near expansion; Tier 3 (larger firms with ERP) is the "system of engagement" play once proven. Sequence strictly — do not skip ahead.

The tiered segment map

Tier	Segment	Fit	When
1 — Beachhead	MCS solar/heat-pump installers, 10–50 staff	Highest (all 3 advantages)	Now
2a	Multi-trade "combo" installers (solar + HP + battery)	High (breadth advantage)	After first references
2b	Adjacent trades — HVAC, construction	Medium (reachable via trade shows)	After first references
3	Larger installers (£5–50m) already on ERP (SAP/Xero/Sage)	Medium (system-of-engagement play)	Once playbook proven

The logic of the sequence

DENSITY BEFORE BREADTH

Winning a **cluster** of Tier 1 installers in one region creates referenceable density — peers talk, case studies compound, trade-show conversations warm up. Jumping to Tier 3 enterprise deals too early spends the lean pod's scarce time on long, complex cycles before the playbook is proven. Earn the right to expand by winning the beachhead first.

Expansion triggers (evidence-gated)

- Move to **Tier 2** when: 3+ referenceable Tier 1 customers + a repeatable demo-to-paid motion (Pack 10).
- Move to **Tier 3** when: the SAP system-of-engagement pitch (Pack 09) is demo-proven and at least one mid-size reference exists.

Implication

Segmentation is not a static picture — it is a sequenced plan with explicit triggers. The staffing (Pack 13) and launch (Pack 21) plans assume this order; changing it changes the burn and the risk.
