

Target List Build Method

A repeatable method to turn the public MCS database into a named, prioritised prospect list.

Pack 06 — ICP & Segmentation

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Target List Build Method
Purpose	Give the SDR a concrete, compliant procedure to build the week-one target list.
Status	Build-now · Verified sources + method
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~4 min

BOTTOM LINE UP FRONT

The target list is built for near-zero cost from the **public MCS Installation Database**, cross-referenced with Companies House (size) and LinkedIn (named decision-makers). This turns "who do I even call" into a ranked list of named MDs and ops leads at qualifying installers — the single highest-leverage week-one task.

The method, step by step

1. **Pull qualifying installers** from the MCS Installation Database — filter to solar PV and heat pump certifications in the beachhead region.  (public)
2. **Size-filter via Companies House** — SIC-code + employee/turnover signals to keep firms in the ~10–50 staff band.  (free, public)
3. **Name the decision-makers** — cross-reference each firm on LinkedIn to identify the Owner/MD and Operations Lead (the two personas).  (manual/semi-automated)
4. **Score and rank** — apply the ICP scoring (reachability, pain, switching-readiness, price-fit) to prioritise.
5. **Enrich contactability** — add verified emails/phones (from the firm's own site or a paid B2B data source such as B2B Data Scout / Prospect360 where needed). 

COMPLIANCE NOTE

Check the MCS database's terms of use before any automated scraping, and handle all contact data under UK GDPR (Pack 15) — lawful basis, suppression of opt-outs, and an ICO registration in place. Do not import any third party's proprietary client list.

Output

A living, ranked spreadsheet: firm · trade · size · MD name · ops-lead name · contact · ICP score · status. This is the SDR's daily worklist and the top of the pipeline (Pack 10).

Implication

Because the core source is free and perfectly matched to the ICP, month-one pipeline does not wait on budget or trade shows — the SDR can begin qualified outreach on day one (Pack 08).

Sources & confidence

Claim	Source	Confidence
MCS database, Companies House	public registries	 Verified
LinkedIn cross-reference method	standard practice	 Manual effort
Paid enrichment options	vendor sites	 Public
