BOTTOM LINE UP FRONT

Fill the pipeline in a deliberate order: **free, targeted MCS-database outreach from day one**; trade shows for reach and credibility on the fixed 2026 calendar; RECC/HIES channel partnerships once there are UK references. Lead with the cheapest, most-qualified source; layer paid/partnership channels as the business earns them.

1. Channel priority (cost × speed × fit)

Priority	Channel	Cost	Speed	Fit
1	MCS-database direct outreach	~Free	Immediate	Perfect (every target is ICP)
2	Trade shows (calendar below)	Med–High	Event-timed	High
3	RECC / HIES partnership	Low	Slow (relationship)	High + credibility
4	Content / SEO (Pack 07)	Low–Med	Slow build	Medium
5	Paid ads / bought data	Med	Fast	Medium (validate CAC)
6	RRUP warm referrals (EU customers with UK links)	~Free	Depends on RRUP	High (? ask RRUP)

2. The fixed 2026 trade-show calendar

Event	Dates	Scale	Role
Futurebuild	12–14 May 2026, ExCeL London	26,590 visitors	Construction-vertical reach
InstallerSHOW	23–26 Jun 2026, NEC Birmingham	40,000+ visitors	Largest installer audience
Solar & Storage Live	22–24 Sep 2026, NEC Birmingham	20,000+ pros, "Meet the Installers" zone	Most ICP-dense

SEQUENCING INSIGHT

Don't wait for a trade show to start selling. The MCS-database motion generates qualified pipeline in **week one** at near-zero cost. Trade shows then amplify reach and warm the market — but they're an accelerant on an already-running engine, not the ignition.

3. Month-one focus

The SDR builds the target list (Pack 06) and runs the outreach sequences (see Outreach_Sequences) against the beachhead region. Everything else layers on top once pipeline is moving.

Implication

Because the primary channel is free and immediately available, the venture is not gated on marketing budget to start generating pipeline — which materially de-risks the early funding position (Pack 16/17).
