

Demo Playbook

How to run a 20-minute vertical demo that ends in a trial sign-up.

Pack 09 — Sales & Pitch Playbook

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Demo Playbook
Purpose	Standardise a high-conversion demo tailored to the prospect's trade.
Status	Build-now · Method (demo specifics pending live access)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

BOTTOM LINE UP FRONT

The demo is not a feature tour — it is a **tailored re-enactment of the prospect's own workflow**, ending on the two differentiators (Work-Flow automation, cross-vertical breadth) and a trial sign-up. Show their pain solved, not the product's menu.

The 20-minute structure

Minutes	Segment	Content
0–3	Recap their pain	"You told me quotes take X and commission maths eats Y hours..."
3–10	Their workflow, live	Lead → branded quote → e-signed contract → job → auto commission
10–15	The two differentiators	Work-Flow automation; one system across their trades
15–18	Proof + price	600+ deployments; per-seat priced to start small
18–20	Trial close	"Let's get your data in and your team using it free for 30 days."

Tailoring rules

MAKE IT THEIRS

Where possible, configure the demo environment with the prospect's trade, product types and branding so it looks built for them. A solar installer should see solar; a heat-pump installer should see heat-pump. Generic demos convert far worse than ones where the prospect sees their own business on screen.

Discipline / boundaries

DO NOT OVER-CLAIM

Only demonstrate features you can actually show working. UK-specific depth (MCS/DNO/ECO4 automation, offline field sync) must be **demo-verified before it is shown or promised** (Pack 20). Never reference the Polsat claim. Never pitch on a demo instance you haven't confirmed is live that morning — the environment was down once already.

Implication

A repeatable, tailored demo is the highest-conversion asset the pod owns. Building 2–3 pre-configured vertical demo environments (solar, heat pump, multi-trade) is a worthwhile early investment for the Implementation lead (Pack 12/13).

Sources & confidence

Claim	Source	Confidence
Product flow shown	Pack 02	 Verified
UK-specific feature depth	demo unavailable	 Pending verification
