

Discovery Framework

The questions that surface and quantify pain — the foundation of every winnable deal.

Pack 09 — Sales & Pitch Playbook

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	Discovery Framework
Purpose	Give the AE a disciplined discovery structure that qualifies and builds the business case.
Status	Build-now · Method (MEDDIC-informed)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

BOTTOM LINE UP FRONT

Discovery does two jobs at once: **qualify** (is this a winnable ICP deal?) and **quantify the pain in pounds** (the basis of the whole business case). Use a light MEDDIC spine so a lean team qualifies ruthlessly and never demos into a dead end.

The discovery spine (MEDDIC-informed)

Element	Question to answer
Metrics	What is the status quo costing? (quote turnaround, deals slipped, admin hours, commission errors)
Economic buyer	Is the MD/owner engaged or reachable? (Pack 06 personas)
Decision criteria	What must be true for them to switch? (price, adoption ease, UK compliance)
Decision process	Who signs, what's the timeline, what's the trigger?
Identify pain	The 2–3 concrete, daily frustrations — costed
Champion	Usually the ops lead — who feels the pain most?

The pain-quantification move

TURN PAIN INTO POUNDS

"How long does a quote take today, and how many do you lose to slow turnaround?" → an estimated £/month of leaked revenue. "How many hours a week on compliance paperwork and commission maths?" → an hourly cost. These become the prospect's own numbers in the business case — far more persuasive than any feature list. Use the prospect's figures, never invented ones.

Qualification gates

Advance to a demo only when: ICP-fit confirmed (Pack 06), at least two pains quantified, and the economic buyer is engaged or a credible champion exists. Otherwise, nurture — don't burn the lean pod's demo time.

Implication

Good discovery is what lets a small team punch above its weight: fewer, better-qualified demos convert far more than many unqualified ones. This framework feeds the demo (next) and the pipeline exit criteria (Pack

10).
