

SAP Co-existence Positioning

The "system of engagement, not system of record" thesis for larger, ERP-run installers.

Pack 09 — Sales & Pitch Playbook

Prepared by Waqas Mian · **Prepared for** Chief Executive Officer, RRUP sp. z o.o.
(SalesOps CRM)

Date July 2026 · **CONFIDENTIAL — PARTNER REVIEW**

Document	SAP Co-existence Positioning
Purpose	Equip the pod to win larger Tier-3 prospects without triggering a rip-and-replace fight.
Status	Build-now · Reasoned (proven sales pattern)
Prepared by	Waqas Mian · for CEO, RRUP sp. z o.o. / SalesOps CRM
Version / Date	v2.0 · July 2026 · Reading time ~5 min

BOTTOM LINE UP FRONT

For larger installers already running SAP, Xero, Sage or QuickBooks, do **not** position SalesOps CRM as a replacement. Position it as an agile **system of engagement** that sits on top of their existing **system of record** via API — handling the trade-specific work their ERP does badly, without threatening the finance backbone they will never rip out.

1. The thesis

Large firms keep their general ledger and accounting in a heavy system of record (SAP/Xero/Sage) for good reasons — regulatory reporting, sunk cost, finance-team familiarity. Trying to displace that is a losing, multi-month fight. But those systems are poor at trade-specific field work: solar array layout, heat-pump flow/COP sizing, on-site quoting, crew dispatch, compliance capture.

THE WINNING FRAME

"Keep your finance system exactly as it is. We sit on top of it as the fast front-end your field and sales teams actually use, and we pipe the clean data back into it via the API. You get the trade-specific workflow without a risky finance migration — and without the tens of thousands it would cost to bolt this onto your ERP."

2. Why it works

- **Removes the biggest objection** ("we're not replacing SAP") before it's raised.
- **Reframes the purchase** from "rip and replace" (scary, slow) to "add a productivity layer" (safe, fast).
- **Leans on a verified strength** — the open API (Pack 02) — not an unverified claim.

3. Boundaries

SCOPE HONESTLY

The specific integration depth to any given ERP must be scoped with RRUP's technical team (Pack 20) — do not promise a turnkey SAP integration you haven't confirmed. Position the *architecture and intent* (which is sound and standard), and scope the specific build in discovery.

4. Implication

This is the Tier-3 expansion play (Pack 06) — hold it until the beachhead is won and the API integration path is confirmed with RRUP. Used at the right time, it opens larger deals that price-led positioning alone cannot.

Sources & confidence

Claim	Source	Confidence
Open API exists	rrup.pl	 Verified
System-of-engagement pattern	standard enterprise-software strategy	 Reasoned
Specific ERP integration depth	—	 Scope with RRUP (Pack 20)
